Авторский профиль в Scopus (<u>www.scopus.com</u>)

Общая характеристика.

Scopus - библиографическая и реферативная база данных и инструмент, предоставляющий возможности получения наукометрических данных. Включает:

- ✓ 19,000 академических журналов от 5,000 различных издательств, включая более 200 российских изданий;
- ✓ 45,5 миллиона рефератов;
- ✓ 24,5 миллионов записей с цитируемыми ссылками, начиная с 1996 года;
- ✓ 21 миллион записей до 1996 года (начиная с 1823 года);
- ✓ 4,6 млн. материалов научных конференций;
- ✓ 300 продолжающихся изданий;
- ✓ 24,7 миллиона патентных записей;
- ✓ результаты из 350 миллионов научных web-страниц через Scirus.com.

1

Scopus индексирует научные источники, издаваемые на различных языках, при условии наличия у них англоязычных версий рефератов.

Для авторов, которые опубликовали более одной статьи, в Scopus создаются индивидуальные учётные записи — профили авторов с уникальными идентификаторами авторов (*Author ID*).

Эти профили содержат следующую информацию:

- ✓ варианты имени автора
- ✓ перечень мест его работы
- ✓ число публикаций
- ✓ период публикационной активности
- ✓ области исследований
- ✓ ссылки на основных соавторов
- ✓ общее число цитирований публикаций автора
- ✓ общее число источников, на которые ссылается автор
- ✓ индекс Хирша автора и т.п.

<u>Профиль автора.</u>

Регистрация в SCOPUS открывает автору дополнительные сервисы при работе с продуктами Elsevier. Процесс регистрации проходит быстро и бесплатно.

1. Зайти на сайт <u>http://www.scopus.com/</u>. Нажать кнопку *Register* (в правом верхнем углу).

2. Заполнить обязательные поля регистрационной формы (со значком *). После заполнения всех обязательных полей формы нажать кнопку **Register** (внизу формы). При успешной регистрации на указанный автором адрес электронной почты придет письмо-подтверждение создания кабинета пользователя. При последующих сеансах работы с базой данных Scopus ссылка *Login* позволит войти в созданный личный кабинет.

Внимание! Процесс регистрации необходимо осуществлять с компьютеров, подключенных к сети БГУ.

Способы корректировки библиографической и библиометрической информации в БД Scopus:

2

1. Объединение авторских профилей. 1 вариант.

Зайти в базу данных Scopus. Выбрать опцию Author search. В поле Author Last Name ввести фамилию автора, в поле Initials or First Name ввести 1 инициал без точки и нажать кнопку Search.

Approximation action	Affiliation search Advanced search

Автор попадает на страницу *Scopus Feedback*, где для уточнения данных он должен последовательно осуществить 5 шагов. После каждого шага нажать кнопку *next*. Первый шаг – нажать кнопку *Start*. Второй шаг – выбрать из предлагаемого списка фамилий наиболее предпочтительный вариант для уникального профиля автора. Третий шаг – из списка документов автора исключить не принадлежащие ему (отметить красным крестиком). Четвертый шаг – еще раз ознакомиться со списком публикаций автора (при необходимости вернуться к третьему шагу). И последний шаг – дополнить контактную информацию о себе. Если автор не нашел своих работ в сформированном базой данных списке, то добавить свои публикации можно нажав кнопку *Missing Content Request form*, где находится форма, поля которой необходимо заполнить. Если автор хочет дополнить данные о цитировании своих работ, то нужно нажать кнопку *Citation Correction Request Form*, поля которой также необходимо заполнить.
